25X1	

1. Nineteen jet fighters and eight conventional fighters were parked on the northern edge of the Cranienburg (N 53/3 67) airfield. The weather was good but there was no flying

2. Description of aircraft;

a. Jet fighter: Low-wing monoplane, wing span about 5 meters, air intake at nose, apparently in the shape of a lying oval, air exhaust at tail. High rudder assembly slanting to the rear and extending about 2.5 meters above fuselage, elevator assembly set at upper third of rudder assembly. Markings and antennae were not observed.

b. Piston-powered fighter: Low-wing monoplane, in-line engine, three-bladed propeller, mounted glass cockpit, painted silvery, no markings.

3. Fifteen air force soldiers and two air force first lieutenants wearing silver epaulets were observed on the way to the airfield from their quarters in the restricted area. Truck

[REDACTED] was leaving the field. About 15 trucks [REDACTED] were parked on the northern edge of the landing field. A radio truck the size of a furniture van was seen at the northwestern corner of the field. Other radio or radar stations or AAA emplacements were not observed at the field. The landing field and runway were dry. The N-S runway showed several dark and wet spots. From the rust which had accumulated on the rails of the spur track on the northern edge of the field it was inferred that the track had not been used for a long time.
